Profile

MCA student and applied AI developer with a BCA, two software internships, and founder experience building and shipping KAOSLY. Builds AI agent workflows, computer-vision applications, and generative-media pipelines in Python and TypeScript.

Technical skills

Python, TypeScript, React, Flask, PyTorch, Hugging Face, OpenCV, Whisper, Wav2Lip, FFmpeg, Firebase, Genkit, Gemini API, Tauri, Git

Experience

Founder and Executive Director | Chaotic Tech Private Limited, KAOSLY Mar 2026-Present

- Led product and engineering for KAOSLY, continuing development begun in late 2025; built a Next.js 15, TypeScript, and Firebase creator platform with 129 application and API routes.
- Implemented algorithmic feeds, media tools, communities, messaging, WebRTC streaming, Cashfree payment and payout workflows, and four Gemini/Genkit AI flows.

Intern | Bretton Woods Finlease Limited May-June 2024

- Developed a responsive website with HTML, CSS, JavaScript, and database integration; created an NLP chatbot for user queries.
- Set up a test server to evaluate website performance.

Intern | Behtar Zindagi Pvt Ltd July-August 2024

- Completed website front-end, data visualisation, and response-status checking assignments.

Selected projects

KAOSLY AI | React, TypeScript, Tauri

- Built a multi-provider AI workspace with chat and agent workflows; normalized tool calls, enforced approval gates, separated browser sandboxing from native execution, and covered core behavior with 294 automated tests.

Talking Avatar Generator | Python, Whisper, Wav2Lip

- Created a staged notebook pipeline that turns a portrait and audio recording into a talking-avatar video through transcription, video generation, lip sync, and optional enhancement.

Threat Recognition System | Flask, OpenCV

- Developed a video-analysis prototype for weapon and violence recognition with incident review in a Flask dashboard.

Education

Master of Computer Applications | USICT, GGSIPU 2026-Present

Bachelor of Computer Applications | Maharaja Surajmal Institute 2022-2025

CGPA: 7.81/10 | First Division | Coursework: Data Structures, DBMS, Cloud Computing, Machine Learning with Python

Achievements and leadership

- BuildWithIndia (HackWithIndia): placed among the top 5,000 of 25,000 participating teams.
- Hackathons: Smart India Hackathon 2024 internal participant; organised the YOUTH4FUTURE Hackathon in 2024.
- Training and workshops: Data Analytics workshop by CETPA in 2024; organised the two-day PersonaRise workshop in 2023.
- Campus leadership: Student Editorial Board committee member for Creation 2023; discipline team member for Avensis'25; Communifiesta participant in 2023.
